Portable Blood Pressure Monitor

DX10

DX10 is an LED screen Electronic Sphygmomanometer, simple interface and one-key measurement, it can measure NIBP accurately, NIBP records can be reviewed by the memory button and support voice broadcasting(optional). The device is widely used in family, clinic and physical-examination center for routine test.

Performance

- Measurement method: Oscillometry
- Measurement mode: upper-arm type
- Measurement range: 0 kPa(0 mmHg) ~ 39.6kPa(297 mmHg)
- Resolution: 0.133kPa(1 mmHg)
- Accuracy: +0.4kPa(+3 mmhg)
- PR measurement range: 40 bpm ~ 240 bpm
- Inflation: automatic Inflation by force pump
- Deflation: automatic mulistep deflation
- Display: LED large colour screen
- Power: Four "AA" batteries/5V power adapter
- Safety character: Class II Type BF

Features

- Small volume, one- key measurement, easy to operate, big font in displaying, simple and easy to understand the displayed contents.
- Support voice broadcasting (optional).
- Start measuring manually, record each measurement data and store up to 199 groups of data.
- LED colour screen. Automatic power off when there is no operation for a long time, achieves saving power.
- High pressure prompt.
- Low battery and error information indication.
- Optional units: mmHg and kPa.

Physical Characteristic

Dimension:130mm(L)x110mm(W)x80mm(H)

Operation environment:
Temperature:+5c~+40c
Relative humidity: 15%~85%
Atmospheric pressure: 700 hPa~1060 hPa

Storage enviornment:
Temperature:20°C ~ 55°C
Relative humidity: < 95%
Atmospheric pressure: 700 hPa ~1060hPa

Accessories

- Cuff for adult
- User manual
